Connecting You to the Value of Membership

libraries matter in 2020? The consensus seems to be *of course* libraries will matter, but how they look, what they do, how they do it — even *who does it* — is still being thrashed out in Library Land. **SAMM 2006** invites you all to engage in the debate, sharpen up your thinking, and head back home with an extra suitcase full of inspiration and new ideas. From the opening speech to the final thought-provoking session, SAMM 2006 intends to challenge the tried and true and spark discussions that will keep on going.

Opening up the SOLINET Annual Membership Meeting will be Dr. Robert S. Martin, Lillian Bradshaw Distinguished Professor of Library Science at the School of Library and Information Studies at Texas Woman's University and Special Advisor to the President for Cultural Heritage Institutions at OCLC. Dr. Martin recently completed a four-year term as Director of the Institute of Museum and Library Services (IMLS) in Washington, DC; during his tenure, IMLS awarded grants totaling nearly \$900 million to more than 4,700 U.S. museums and libraries. While serving at IMLS, Dr. Martin promoted strategic partnerships and took a leadership role in identifying and disseminating best practices for the creation, management, and preservation of digital resources.

Rather than the customary promotion of "model" programs, SAMM 2006 will host concurrent sessions designed to highlight the questions, clarify

*Please see SAMM 2006, page 6*

**S**OLINET has just completed the latest round of strategic planning surveys of the membership and would like to thank the many of you who took the time to provide us with input on your directions, assessment of our current services, and feedback on our performance. The survey was long, the questions complex, and it certainly took commitment to respond. The results are in and are already shaping SOLINET's strategic plan and service models. A detailed report on the results is

included on page three of this issue of *Solutions*. A few highlights: First, the high importance given by respondents to assessment of programs, services and/or collections was notable. While there has been growing emphasis on assessment in libraries for several years, the strong interest in this across types of libraries, membership category, and

## A TRIP TO THE LIBRARY

A recent outing with my 3 ½-year-old son, Christopher, got me thinking about the future of libraries and the roles that libraries play in children's lives. Christopher and I were at the public library near our Atlanta home. While there, he was able to sample some Curious George books, a few from Dr. Seuss and finally some books with just really silly pictures.

Christopher loves books and this was not our first visit to a library, but every time is a new experience for him. I've explained to him that the good people at the library "share" their books and CDs with us.

Our visit made me wonder what libraries will be like when Christopher is an adult. What will he find in a library 15 or 20 years from now? Will it still be filled with books and electronic material? Will a librarian still be there to help him? Will he go to the library or will the library come to him? Will the library matter to him?

I know I'm not the only one thinking along these lines. Many of you probably spend much of your time every day working on issues like this for your community. As your library cooperative, these are questions we at SOLINET are also asking ourselves. The answers affect not just everyone in the library profession but anyone who is affected by or served by a library.

So to help you share ideas about the future of libraries, SOLINET will focus its [2006 Annual Membership Meeting](#) (May 11 and 12) on the question "Will Libraries Matter in 2020?" You can hear what respected colleagues and leaders in the profession are saying and doing to address these and other questions about the future of libraries. Because all libraries are different and all patrons are different, we are working to make sure that you can hear these questions addressed from a variety of viewpoints. So come prepared to hear thought-provoking discussions and be prepared to share your own ideas.

# THE RESULTS ARE IN!

## SOLINET'S BIENNIAL MEMBERSHIP SURVEY

By **Sandy Nyberg**  
SOLINET Grants Officer

The Board of Directors and staff recently surveyed members to gather information and insight on priorities and needs for libraries in the region. The survey is a valuable tool in SOLINET's strategic planning process. It provides information that will be used to shape SOLINET's future and help the Board develop a vision of what we want our organization to be and do for members.

An independent research firm, Idleman and Associates, sent the online questionnaire to directors at 1,341 SOLINET member libraries in September 2005. The distribution represents 90% of all governing members, 83% of associate members, and one-third of affiliate members. The overall response rate to the questionnaire was 42%. Although responses came from all types of libraries, 59% came from academic libraries (which are 35% of SOLINET's membership) and 27% from public libraries (which are 34% of SOLINET's membership).

### STRATEGIC DIRECTIONS

The questionnaire first asked members to identify strategic directions for their organizations in the next two years and rank them in comparison to other possible directions (see [Table 1](#)). Respondents ranked "technologies and their impact on library users and services" as most important, closely followed by "assessment of programs, services, and/or collections." These two areas were ranked most important by all membership groups and by most library types. The third and fourth most important strategic directions for respondents are "management of electronic resources" and "effectiveness of library

► Continued from Page 1

geographic location has made assessment a significant element in the developing SOLINET strategic plan. Second, the continued importance of technology and its impact on libraries will affect SOLINET's educational programs, the products SOLINET offers, and consulting provided. The strategic plan will emphasize diversification of SOLINET's library technology offerings across the organization. Third, members indicated that they value a wide range of SOLINET services, with access to OCLC, educational services, and electronic resources rated most highly. These will continue to be the backbone of SOLINET's programs for the region's libraries. Among those SOLINET-provided support services most valued by SOLINET members are access to expertise and information from SOLINET staff, facilitating and providing a forum for cooperation, and support services by telephone and email. These top three illustrate the combination of supporting products and services as well as the regional cooperative role that we strive for at SOLINET. Fourth, the survey also provides an opportunity for respondents to comment on SOLINET's weaknesses. The most commonly mentioned dimensions to these

responses were issues related to training delivery, particularly geographic location and price, and the need for increased communications with members. We take this feedback seriously, and we are working on ways to improve in both of these areas. Our growth of web-based delivery of courses is designed to address the challenges of geographic distance and the costs of attending training. We are considering other innovations in response to the survey results. And, SOLINET is in the process of revamping our communications processes and tools.

As you can see, your responses give SOLINET lots of food for thought and lots of input for action. Watch for the SOLINET Long Range Strategic Plan, to be issued this spring. And, watch for announcements of new SOLINET services and programs, courses, and activities. You spoke, and we have listened!

*Kate Nevins, Executive Director, SOLINET*

## SOLINET REACHES OUT WITH VITAL DISASTER PREPAREDNESS TRAINING AT A PRICE YOU CAN'T REFUSE

Just as they waded into the stricken Coastal region to assist in recovery operations after Hurricanes Katrina and Rita, SOLINET and its partners in prevention and preservation will be touring the Southeast during March and April to hammer home the importance of training and preparation in advance of a possible disaster. Support from the [National Endowment for the Humanities, Division of Preservation and Access](#) will reduce the registration fee to only \$25 per person.

"We hope that the reduced registration fee will enable staff at more libraries and archives to take advantage of this training, especially those from smaller institutions with very limited budgets for staff development," says SOLINET Preservation Services

Manager Tina Mason. "Time and money spent taking the steps to protect your collection repays itself in minimizing loss of collections. Everyone is at risk — whether it is mold due to a broken AC or water damage from a pipe burst or leaky roof. It's not just institutions threatened by hurricanes or tornados. A developed plan, a prepared staff, and materials and resources at hand when disaster strikes are the best assurance you can have."

Thirteen classes, strategically offered throughout the region to accommodate the largest number of students, will focus on disaster planning and recovery and on hurricane preparedness. The [Disaster Preparedness](#) class stresses informed preparation and training designed to prevent disasters to the degree possible and to mitigate those that are not preventable. Each one-day class will provide the training necessary to plan, organize, and execute a disaster plan and a salvage operation with demonstrations of salvage techniques such as packing out wet materials, air-drying books, separating and drying manuscripts, and drying photographic materials.

Please see *Disaster*, page 6

## WAYS YOU CAN STILL HELP THE HURRICANE-HIT LIBRARIES

By **Fatima Raza**  
Solutions Editor

When Hurricane Katrina devastated parts of Louisiana, Mississippi, and Alabama, public libraries became the place to go for people to connect with family, friends and with news and information

Photo by Fatima Raza

Donated computers helped libraries serve evacuees' needs for connecting with loved ones and getting updated information about hurricane recovery efforts.

about the disaster and recovery efforts. Frequently, the public libraries were the only places that had power and an Internet connection, both vital commodities when survivors wanted to search for missing family members and let their loved ones know that they had come through the disaster.

"This shows that in a time of crisis, people do turn to libraries," said Sharman Smith, Mississippi State Librarian. "The library provided not just access to necessary information but also a sense of normalcy."

SOLINET, OCLC, and the state librarians in Louisiana and Mississippi brainstormed ways to support affected institutions and help them continue to serve their patrons. Ideas presented include

- Finding ways to process and store donations until the libraries are ready for them
- Working with vendors to help the affected libraries build strong opening day collections
- Discussing where libraries should be in five years and implementing those ideas in the rebuilding efforts, so the libraries can come back stronger than they were before the disasters
- Creating a clearinghouse of information for the region listing recovery resources
- Providing training for state library staff on how to help others apply for recovery grants and aid from FEMA and other organizations
- Creating a template to help all libraries write a disaster plan
- Creating jobs, especially short-term work for staff at libraries temporarily closed after the hurricane.

These proposals are still being studied, and no definite plans have been put into place yet. New ideas are always welcome and may be shared by emailing [Sandra Phoenix](#).

## CCC TRS VPP = SAVINGS FOR SOLINET MEMBERS

By Sara Swain  
Solutions Associate Editor

**S**OLINET member libraries that use the [Copyright Clearance Center's](#) (CCC) Transactional Reporting Service (TRS) — especially for interlibrary loan, document delivery, and print reserves — will welcome the opportunity to save money by participating in the Volume Purchase Program (VPP). TRS, a popular and widely used CCC solution for academic users, provides internet access to permissions and prices for photocopying copyrighted material. VPP is a consortial discount program for TRS users that provides a 67% discount off the TRS processing fee.

A VPP-eligible consortium is a voluntary and expandable aggregate of TRS users whose collective annual payout on copyright permission was at least \$10,000 the previous year. The SOLINET membership as a whole meets that requirement, making any SOLINET member using TRS eligible to participate. The individual participant

experiencing the greatest benefit from the program will have more than 30 such transactions per year — in particular, mid-size libraries with smaller collections and a greater need for ILL. Any library can determine its use history by logging in to its CCC account.

On behalf of the membership, SOLINET will handle the online registration applications and keep CCC regularly informed on the ongoing eligibility of the consortium members. Once the account is activated for the discount program, SOLINET will invoice members for an \$85 annual registration fee.

CCC will continue to directly invoice the VPP libraries for TRS royalty and processing fees. The royalty fee, of course, goes to the copyright holder. The processing fee is where the VPP discount takes place. At 67% off, the regular \$3.00 processing fee becomes only \$1.00, a significant savings for volume users.

## WAKE FOREST HELPS SEP FUND RAISING TOP \$1 MILLION

By Fatima Raza  
Solutions Editor

**S**OLINET member Wake Forest University has helped the fund-raising effort for an online philosophy resource top \$1 million. This is just one-third of the way to the goal of libraries raising \$3 million to keep the Stanford Encyclopedia of Philosophy available for free.

"Wake Forest University is delighted to have put Stanford Encyclopedia of Philosophy's fund-raising effort over the \$1 million mark," said Lynn Sutton, Director of Z. Smith Reynolds Library at Wake Forest. "Our faculty are impressed with SEP's high quality, and librarians appreciate the creative endowment plan to ensure continued open access."

More than 200 individual libraries and consortia have contributed to the effort to support the innovative online encyclopedia to which philosophers throughout the world contribute original research. Libraries at academic institutions with philosophy programs were asked to contribute to the endowment. SOLINET, the International Coalition of Library Consortia (ICOLC), and the

Association of Research Libraries' Scholarly Publishing and Academic Resources Coalition (SPARC) have joined Stanford University and the SEP staff to build a \$4.125 million endowment for the publication.

"Libraries were asked to raise \$3 million of this total," said Timothy Cherubini, SOLINET's Manager of Program Management & Development and SEP Project Lead. "The awarding of a National Endowment for the Humanities Challenge Grant to SOLINET in December 2004 will, if enough library contributions are forthcoming, provide a significant portion of this goal. The NEH will match \$1 for each \$3 raised by the libraries, up to \$500,000. This is a wonderful incentive."

While the library community focuses on raising its \$3 million with the NEH's help, Stanford University is pursuing the remaining \$1.25 million from private individuals and corporations.

Keep in mind that the fund-raising effort has only reached one-third of its goal, so contributors are still needed. For more information or to contribute, contact [Cherubini](#) or see the [product page on SOLINET's website](#).

## SOLINET CALENDAR

»	<b>March 28-30</b>	SOLINET at Louisiana Library Association conference (Lafayette)

## SAMM 2006

► *Continued from Page 1*

the issues, and encourage wide-ranging, in-depth, thought-provoking debate and discussion on the what, who, when, where, and how of libraries, today and in the future. For example, "Librarians 2020: The Face of the Future" will grapple with the question of what does it take to be a world-class librarian? Is it the MLS? Or the people-serving orientation? In another sphere, "The Future Use and Users of Electronic Library Resources" will look at the future from the perspective of OCLC's environmental scan and the newly released "[Perceptions of Library and Information Services](#)." Twelve concurrent sessions in all, in four time slots, will keep your brain in motion all day Thursday.

Friday brings the debate to the whole house: Google, in all its glorious controversy, will get a major hearing. David Ferriero, Chief Executive of Research Libraries at New York Public Library, one of the "Google Five" sites, will discuss his library's participation in the ambitious scanning effort. He will be joined by a representative from Google's headquarters. Together, they will share their views on how the Google Book Search program might affect the work of other libraries in terms of digitization, collection development, and preservation, as well as the ongoing concerns about possible copyright infringement and the political fallout within the higher education community since the program was announced a year ago. This is SOLINET member librarians' opportunity to weigh in on the debate: Is this the golden opportunity to enhance the visibility of library collections in new environments? Or is it opening the door to Google to become the gatekeeper to those collections? To quote [dlib.org \(September 2005\)](#), "the questions raised by this initiative are both timely and significant."

With plenty of food to keep the energy high, old friends and new to toss around ideas old and new, and good old-fashioned debate to fuel your journey into the future, SAMM 2006 will be an experience you won't soon forget. So, mark your calendars, watch the SOLINET website for program information as it develops, and get your registration in on time (April 30) to get the Early Bird discount. May 11-12, 2006. [Georgia Tech Hotel and Conference Center](#), Atlanta, Georgia.

Be there!

## DISASTER

► *Continued from Page 4*

There is no way to guarantee the survival of coastal institutions in a hurricane. There are, however, steps that can be taken before the storm to increase the chances of survival and minimize devastating damage. There are also steps that can be taken after the storm has passed that can accelerate recovery and minimize loss of collections. But you have to prepare well ahead of time. The Hurricane Preparedness class is a must for libraries and archives in those at-risk areas. The one-day class will address the general issues involved in developing a disaster plan, and it will show you how to make your institution more storm-proof. You will learn what to do before, during, and after the storm, including where to look for available assistance.

While we hope there will never be another hurricane season like the one in 2005, training and planning should be at the top of everyone's to-do list for the new year. Watch the SOLINET Preservation Services website for dates and places convenient to you. The site will be updated regularly as new dates and locations are confirmed.

Washington, D.C.

**DETAILS**

**SAVINGS**

► *Continued from Page 5*

Potential users should understand that the VPP applies only to CCC's Transactional Reporting Service and may not be combined with other discounts or programs. Permissions for course packs, electronic reserves, digital content, or campus republication are not included in the program; please visit the [CCC website](#) for solutions to your needs in these areas.

**GET STARTED AND START SAVING**

Until March 31, SOLINET will submit registrations to CCC every Friday before noon. Registrants can expect to receive the discount within ten business days. Beginning in April, SOLINET will submit registrations received by the 20th of each month, with the discount becoming effective by the first of the next month.

For registration information, please contact the [SOLINET Member Services Help Desk by email](#) or 1-800-999-8558. For all other questions and requests, you may contact the [Copyright Clearance Center by email](#) or 978-646-2600.

**SURVEY**

► *Continued from Page 3*

	Governing/Associate Members		Affiliate Members	
	Rank	% Ranking in Top 1-4	Rank	% Ranking in Top 1-4
Strategic Directions				
Technologies & their impact on library users and services	3.09	75%	2.96	82%
Assessment of programs, services, and/or collections	3.23	74%	3.26	73%
Management of electronic resources	3.52	72%	4.30	54%
Effectiveness of library operations	4.08	56%	3.86	58%
Staff recruitment, retention, and development	4.63	46%	4.88	41%
Management of non-electronic resources	5.22	36%	5.39	32%
Library advocacy and outreach	5.47	32%	4.75	45%
Collaboration with non-library organizations	6.76	11%	6.59	15%

operations.” In addition to the directions listed in the questionnaire, 6% of the respondents wrote that “facilities” are an important issue for them in the near future and another 5% identified “funding and fund-raising” as an important issue.

To better understand what the strategic directions meant in terms of library services and operations, respondents ranking a strategic direction as one of their top four were asked to rate the priority of different activities within that strategic area. For the top-ranked direction, “technologies and their impact on library users and services,” the highest priority activities identified by members were

- Learning about emerging technologies and adapting them to libraries
- Acquiring new technology for the library
- Integrating library resources into the web.

For “assessment of programs, services, and/or collections,” the highest priority activities were

- Assessment of the effectiveness of library services
- Assessment of user needs and expectations
- Collection analysis and assessment.

Within “management of electronic resources,” the highest priority activities were

- Linking/integrating electronic resources
- Electronic journals and books
- Managing and providing support for public access.

► *Please see [Survey](#), page 8*

**SURVEY**

► *Continued from Page 7*

Under “effectiveness of library operations,” respondents identified the highest priority activities as

- Workflow analysis
- Re-allocation of staff.

Although there was generally agreement in the identification of top strategic directions among different types of libraries, there was some divergence in priority levels for activities within the strategic areas. For example, although both academic and public libraries ranked “management of electronic resources” among their top strategic directions, “managing and providing support for public access” was given the highest priority among activities by public libraries but was fifth on the list for academic libraries. Electronic journals rated as a significantly higher priority for public libraries, whereas intellectual property rights management and institutional repositories rated higher for academics.

**Chart 1: Value of SOLINET Services**

(as measured by those who have used the service in the last year, with 4 as very valuable)

**SOLINET SERVICES**

In addition to questions about strategic directions, directors at governing and associate members were asked about use and perception of SOLINET services. As in past surveys, OCLC cataloging and resource-sharing services were not only used by the highest percentage of respondents (95% and 92%, respectively) but also valued the highest (3.9 and 3.8 respectively on a scale with 4.0 as “very valuable”). Continuing education and training classes were used by 74% of respondents and rated 3.5 on the value scale. Discounted purchase of electronic resources was used by 71% of respondents and valued at 3.8. In all areas, utilization of SOLINET services by respondents to the 2005 survey represents an increase over that reported by respondents to the 2003 survey. Chart 1 (above) depicts the value ratings of SOLINET services by respondents whose libraries used them in the past year.

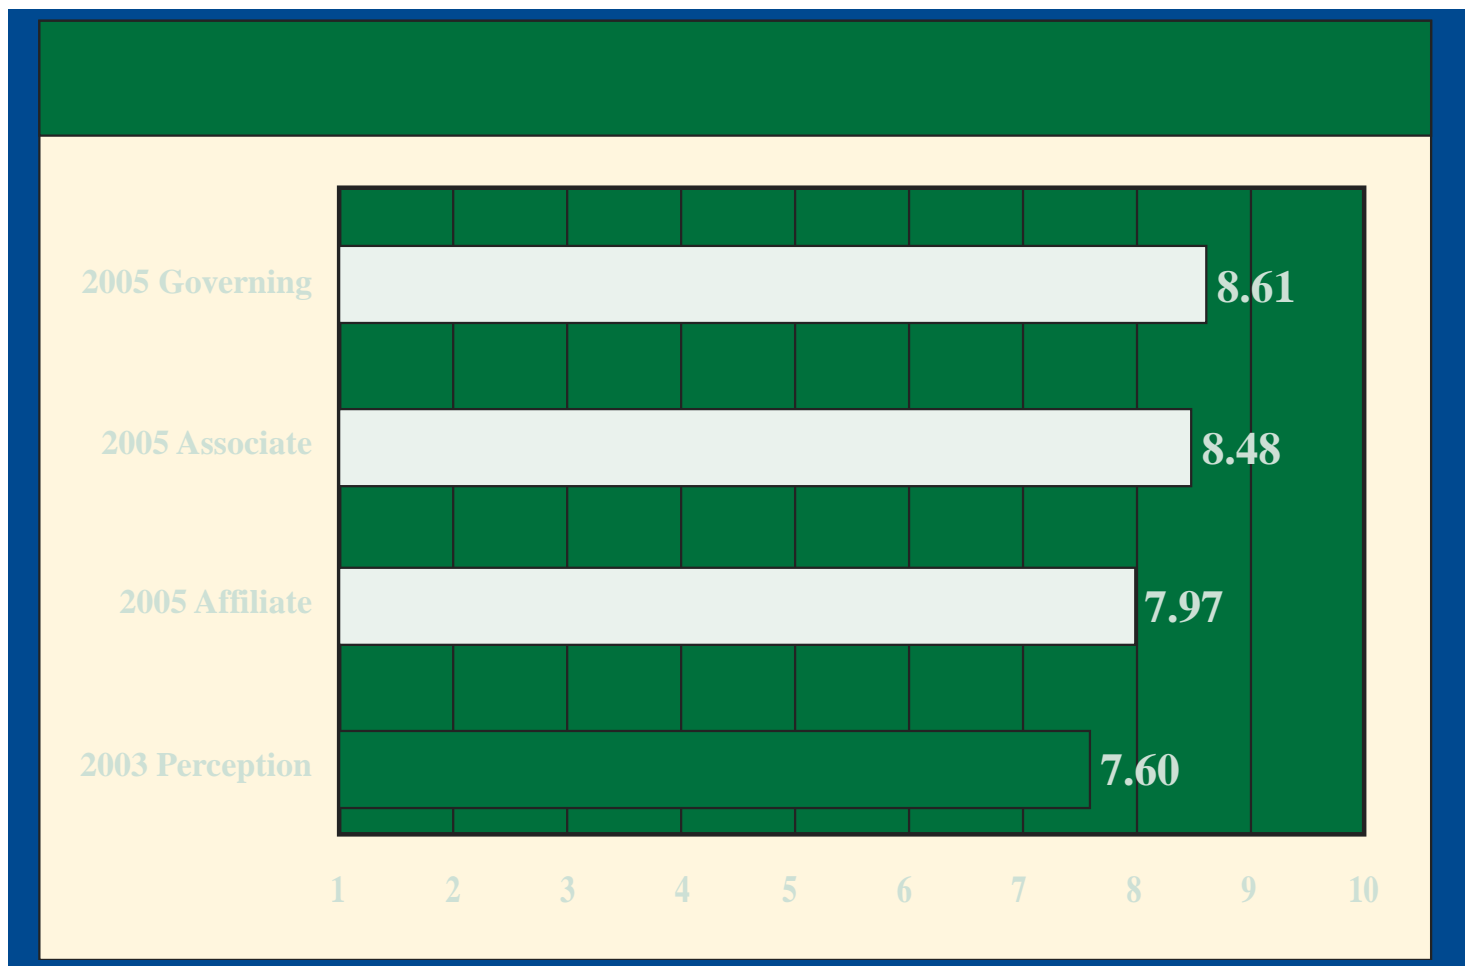

The questionnaire also asked respondents to rate the value of a variety of support services provided by SOLINET. Those valued most are

- Access to expertise and information from SOLINET staff
- Facilitating and providing a forum for cooperation and collaboration

## SURVEY

► Continued from Page 8

- Information and support services by telephone and email
- Networking with other libraries in the region
- SOLINET website
- Consolidation of contracting and billing.

Finally, to assess the overall quality and value of service in the past year, the questionnaire asked respondents to rate SOLINET on a scale from one to 10, with 10 representing excellent. Chart 2 (above) shows the ratings by membership type. In all cases, SOLINET's rating improved from the 2003 survey.

## WHAT'S NEXT?

SOLINET is dedicated to continuously improving service to members. Information collected through the survey helps us to be responsive to members' needs. The survey results will be used for planning and development activities at SOLINET in all program and service areas. At the broadest level, it informs the development of SOLINET's strategic plan, which will be prepared in the next few months and presented at the annual membership meeting in May 2006.

The Board of Directors and staff appreciate the information you've shared with us about your library and your ideas for the future of our organization. If you're curious to compare your library's directions and perceptions with others in the region, see [SOLINET's website](#) for a more detailed report on the survey results. Look to future issues of *Solutions* and other SOLINET communications for updates on the development of our strategic plan.
