A Letter from Robert

Dear LYRASIS Community,

I have been looking forward to writing you and sharing my excitement about the banner year we have just finished, as well as giving you a sneak peek at what is coming. You will find more details on these and other accomplishments in the pages that follow. These are programs, services and initiatives that will directly benefit both you and your institution.

First, an exciting bit of news…

We have merged DuraSpace into LYRASIS, creating one of the most dynamic, creative, and impactful technology and services global not-for-profits!

Before I share with you how this will benefit all of our members - both academic and public libraries, museums, galleries, archives, researchers and scholarly publishers - let me tell you what has not changed.

Our knowledge and content-based mission is still completely aimed at you. We remain a member-focused non-profit partner. LYRASIS is the mission aligned, trusted place where your problems can be researched, ideas formed, and solutions developed and delivered to the community. Our governance continues to be a talented, high powered, volunteer Board comprised of elected members and appointed professionals who ensure all voices are heard. Every single day we recommit ourselves to deliver measurable value; which includes a $1.2M investment into R&D to benefit our members (this brings our total to over $2M since 2016), several new programs for our core communities, and some exciting new partnerships. These investments have been accomplished with no dues increases, nor price increases since 2015!
What has changed is our focus on scale and leverage, our emphasis on connecting with our global partners, and freeing up our resources to better serve you.

- **Scale** - The merger will allow us to unlock the power of 10 Community Supported Programs that are fiscally supported by 1,733 global institutions. This power includes better technology platforms, more secure data pathways, future proofing and economies of scale.

- **Leverage** - We now have over 400 institutions that have trusted their hosting and migration needs with us, thus allowing their institutional resources to be applied toward core mission activities.

- **Connection Points** - These connections are both geographic and by way of partners. From Germany to India to Peru, LYRASIS links institutions with partners such as the University of Michigan Press; SimplyE for reading and discovery via NYPL, DPLA, and Columbia University; CollectionSpace with Oakland Museum and UC Berkeley, and Research information systems at euroCRIS.

- **Investing on your behalf** - We are particularly focused on solutions that improve public reading, meet accessibility standards and provide a seamless interface to both trade and monographs. We are investing in and exploring how publishing can change the face of content and its uses. We are relentlessly pursuing how to move ideas coming from you through a joint community/LYRASIS process, so they end up as valued services for you. We use a unique methodology based on *It Takes A Village*.

Lastly, we just finished our 2019 Member Summit and I loved talking and working with all of you who were able to make it. Looking ahead, I hope you will join us at our 2020 Member Summit, which will be October 27-28 in Philadelphia. We'll see you there!

At the end of the day, it is really all about you! On behalf of the world class team at LYRASIS, thank you for letting us serve you.

Onward!

*Robert Miller, CEO, LYRASIS*

Member Map

Our members are our most important asset at LYRASIS, and we continually seek new ways to communicate, collaborate and work with you directly.

We have members and users in:

- 50 States
- 15 Countries
- 06 Continents
Conversations in the Community

Forums and Member Summit

Our regional, in-person Leaders Forums and annual Member Summit remain a driving force for collaboration and innovation for LYRASIS and our members. Since 2016, we have hosted 31 Leaders Forums and three annual in-person Member Summits, with more than 900 members attending. Out of these have come new programs and services that you have requested.

The Leaders Forums and Member Summit give our members the chance to:
1. Exchange best demonstrated practices
2. Surface opportunities and share solutions
3. Develop new programs and services

Leaders Forums:
By the Numbers

- 550+ Attendees
- 400+ Organizations
- 31 Forums in 2016 - 2019

Annual Member Summit:
By the Numbers

- 327 On-site Attendees
- 250 Remote Attendees for Keynote
The Catalyst Fund
A Grand Total of 17 Programs Seed Funded, Everyone Benefits

The Catalyst Fund completed its third year in 2019. It is a key part of our Leaders Circle, Leaders Forums, and R&D/Channel Development investment for our members. In 2019, $126,370 of Catalyst seed funding and support was given back to our members. Since 2017, over $417,000 has been invested in the Catalyst Fund.

LYRASIS continues to develop and support community approaches that impact the ways that content is acquired, created, discovered and disseminated. A special focus of our work involves fostering growth in open content and infrastructure programs, and assisting university presses and scholarly societies as they seek to create new business models that better meet the needs of our time.

Our negotiations with over 80 carefully vetted content, program and service providers means that collections-holding organizations can depend on LYRASIS to provide high quality licenses, terms of service, and affordable prices due to the strength and leverage of our groups.

**Key achievements this year include:**

- In special partnership with University of Michigan Press, the launch of the Fulcrum open source publishing platform featuring the University of Michigan Press eBook Collection and more
- Established the ORCID US Community to support name disambiguation, metadata integrity, and system interoperability in research and reporting workflows, now with dedicated staff and 125 members
- Research and release of the LYRASIS accessibility survey, *Understanding the Landscape of Library Accessibility for Online Materials*
- 40% growth in the number of US supporters of the SCOAP3 open access program in high energy physics, now a community of over 200 libraries
In FY 2019, LYRASIS members and communities directed 30% of funds for scholarly content and initiatives toward open content and scholarly infrastructure programs, university press and scholarly society content, and local digitization.

**Progress toward Open:** Over $4.2 million was provided to support open access content and open scholarly infrastructure programs alone. Funds spent for local digitization efforts increased by 40% over the prior year.

1,747 institutions support the Content and Scholarly Communication program.
Expanding Our Reach with Technology
New Services, Continuing Growth, Savings at Scale

Our hosting services proudly serve more than 400 institutions, freeing up your valuable staff time to focus on core work, providing reliable, trusted security while helping protect and share your data and collections.

We offer all of this and more...

- Hosting
- Analytics
- Storage
- Future proofing
- Migration

Some significant milestones from the last year include:

- Expanded to 6 hosted services of open-source software
  - ArchivesSpace / CollectionSpace / Islandora / SimplyE
  - DSpaceDirect and DuraCloud added via merger
- Staff of 16 dedicated technology professionals providing best-in-class customer and technology service
- Especially strong growth with SimplyE service, including a newly formed partnership with DPLA and NYPL, and supporting state library systems in Connecticut, Maryland and Montamemersna
- Will announce new service offerings for Islandora V8 and DSpace V7 soon
Using Scale to Keep Pricing Low

0 price increases in 4 years

6 services now offered

45% growth in number of clients since last year
From Local to Global

Introducing the DuraSpace Community Supported Programs Division

Sustainability and Excellence in Open Source

We welcomed 3 new software communities through the merger with DuraSpace, making us home to 5 open source software programs. This means LYRASIS offers end-to-end solutions under a single trusted brand.
Since our founding, LYRASIS Consulting Services has helped institutions with collections stewardship, including digitization, preservation, technology, innovation, and strategic planning. Building off this legacy, this year we provided a wide spectrum of solutions to assist institutions in better serving their audiences. Highlights from this past year include:

- Conducted sustainability consulting based on the LYRASIS “It Takes a Village” Framework, as a national leader in program sustainability planning
- Performed workflow assessments, space planning studies, new technology strategies, efficiency recommendations and strategic planning recommendations
- Provided readiness assessments to preserve analog and digital collections
- Helped clients begin and re-start archives programs and exhibitions
- Conducted metadata assessment and training in copyright issues
- Helped institutions nationwide evaluate collections and plan to get their materials online

LYRASIS Learning
Unlimited Classes, One Low Price

We developed new classes in response to member needs, expanding our topic areas beyond preservation, digitization, and metadata, to include leadership, scholarly communications, and technology. LYRASIS Learning gives you unlimited access to training for an easy annual fee, allowing you to upskill your entire staff simultaneously and without breaking the bank. Due to an increase in LYRASIS Learning participants, subscribers enjoy benefits of scale - increasing class options and one low fee.

- 57 LYRASIS Learning classes
- 799 participants in online class
- 25 new classes presented for the first time in FY2019
- 42 institutions subscribed to LYRASIS Learning
Performing Arts Readiness
Disaster Preparedness for Performing Arts

Funded in 2017 by a $2.5 million grant from The Andrew W. Mellon Foundation and building off of our long time expertise in disaster preparedness for archives, libraries and museums, "Performing Arts Readiness" (PAR) is an initiative that brings together arts and culture organizations to implement creative programs to increase knowledge, ability, capacity and readiness around emergency response and recovery.

$380,000 to 50 different organizations for disaster preparedness planning

For more information, see performingartsreadiness.org.
Understanding the Landscape of Library Accessibility for Online Materials

Accommodating users with disabilities is not a new endeavor for libraries. However, the evolving landscape of content digitization and the shifting nature of the scholarly communication ecosystem present new challenges for libraries attempting to adhere to institutional policies and meet legal requirements regarding online accessibility for those users. Accessibility is as important for us at LYRASIS as it is for our members, which is why we invested in research on the topic. We hope this report helps support accessibility efforts across the community.

The LYRASIS accessibility survey was conducted in early 2019 as a mechanism to better understand how (primarily academic) libraries within the United States are handling accessibility for their online content, and more specifically, where they stand in terms of policy and implementation.

The core output of this survey is the 2019 LYRASIS Accessibility Survey Report. The report is able to identify trends across a wide range of libraries, including:

- Libraries are the most progressive in terms of accessibility when they maintain the most control over their content
- National policies and community technical guidelines on accessibility hold more prominence than local or institutional mandates
- Most accessibility training is self-initiated; more infrastructure is needed to train librarians in accessibility mandates and tools
Fiscal and non-profit business philosophy: LYRASIS is a fiscally solid organization. Our fiscal goal each year is to break even at the operating level, or generate just enough in revenue to cover our operating costs. We have a four year track record of not raising the cost of membership, not raising prices on our services such as hosting, and reducing costs on programs such as LYRASIS Learning.

Investing for our members’ future: Over the last three years we’ve invested more than $1M in R&D/Channel Development programs for our members. For FY 2020, we’ve committed another $1.2M to an important part of our member outreach.

Examples of uses of these funds: Our non-profit investment portfolio and legacy assets mean we can afford to focus on the future. Examples include innovation with member facing R&D/Channel development efforts, market outreach via regional Leaders Forum, seed fund investing with our Catalyst Fund awards and thought leadership through our Leaders Circle.

Partnerships: To accelerate our impact for our members, we work hard on creating a culture of exploration, learning, and innovation. While we have a strong world class team, we are continuously looking outside the organization to increase our impact and reach, lower cost through scale, and collaboratively leverage the work of others through foundational partners, mergers, acquisitions, and unique partnerships.

Fiscal Highlights

- Over $350M of contracts negotiated in the past 5 years
- Over 100+ contracts negotiated each year
- 10 Community Supported Programs that represent 1,733 fiscal partners and 5,000+ users
- Over $5M held in trust for over 500 institutions
- We operate at scale with over 11,000+ invoices issued and collected each year
- These are all examples of being a trusted brand with services that can be outsourced by our members so they can stay focused on core, mission-related tasks

* 2019 Information is unaudited and summarized by management.

LYRASIS’ financial strategy is to run at or near break even with our mission driven services and programs. Excess Operating Income or Board approved income from non-operating assets are invested back into R&D for the benefit of our members. We are proud to say that due to cost management and attention to detail, for the fourth year in a row we have not raised dues or prices on core services, and have lowered prices on key programs.

** LYRASIS has invested $1M+ over the last three years in its R&D programs aimed at developing impactful ideas and innovative programs designed to support our membership communities. An additional $1.2M has been approved for FY2020.
