

Open Research Infrastructure Programs at

IRUS US Community

Goal: Platform independent COUNTER-conformant usage statistics for institutional repositories

Benefits:

- Standards based usage statistics
- Ability to benchmark against peers
- OA platform that allows all stakeholders (authors, institutions, funding agencies) to independently access usage statistics

More Information: [IRUS US Community Page](#)

Contact: Hannah Rosen, hannah.rosen@lyrasis.org

DataCite US Community

Goal: Enable use of DOIs to make research & scholarly content more FAIR (Findable, Accessible, Interoperable, & Reusable)

Benefits:

- Create DOIs for local resources
- Membership cost sharing
- Dedicated support
- Community of practice

More Information: [DataCite US Community Page](#)

Contact: Sheila Rabun, sheila.rabun@lyrasis.org

ORCID US Community

Goal: Uniquely identify researchers and link them to their contributions across different systems

Benefits:

- Disambiguate researchers using a unique persistent identifier
- Connects researchers to their contributions via APIs
- Membership cost sharing
- Dedicated support & community of practice
