Take Back Control of Your eBooks

What if you could increase literacy in your community by making curated eBooks available with one click?

What if you could manage all your eBook content, even from multiple sources, with one simple platform?

What if there was a non-profit, library-centered option for eBooks management?

Benefits of SimplyE

1 Increase your library's impact on emerging readers, raise their reading levels and improve educational outcomes in your community by installing an easy to use, easy to maintain, field tested mobile app.

2 Eliminate fees to large, for-profit platforms all while boosting circulation through active librarian curation by exposing available library picks, normalizing discovery of e-content across multiple sources including open content.

3 Simplify management by giving your users easy, seamless, one-click mobile access regardless of their original eBook source.
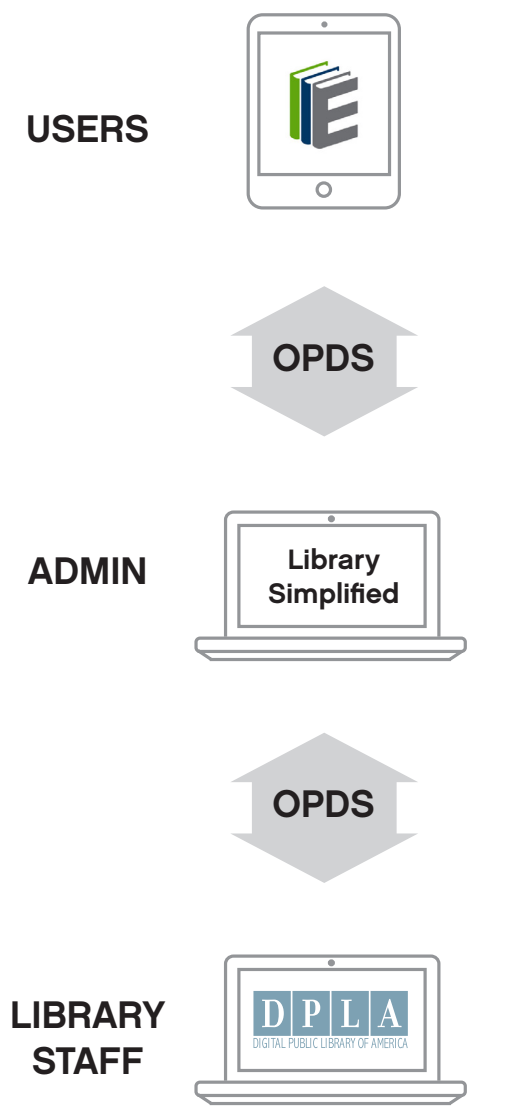

Advantages

- **Improve Literacy** - Customize reading materials to create a bespoke experience.

- **Increase Circulation** - You create curated options and increase availability of available titles.

- **Engage Your Community** - Use your eBook platform to promote library events and other programs to keep users engaged.

- **Easy to Implement** - Let LYRASIS migrate your collections and be up and running quickly.

- **Increase Accessibility** - Committed to advancing and maximize accessibility for those with disabilities

- **Better Use Data** - More intelligent purchasing decisions moving forward because of more accurate and library-owned data in a unified report/source.

- **Local Control** - Take control of your eBook offerings with the user experience in mind, offering deeper browsing, wider net of resources from which they can draw.

- **Participate in the Library-Driven Community** Become an early adopter of this vital library centered program and build something great for the future.

DPLA — DIGITAL PUBLIC LIBRARY OF AMERICA | **LYRASIS**®

SimplyE is funded by IMLS and the Alfred P. Sloan foundation, built and tested by NYPL and the State Library of Connecticut, turn-key hosting and support by Digital Public Library of America and LYRASIS.

LIBRARY STAFF

DPLA
DIGITAL PUBLIC LIBRARY OF AMERICA

SimplyE-Hosted Reading App

- Patrons can browse and search a unified catalog of all library's e-content sources such as Overdrive, Bibliotheca, Access 360, RBDigital, DPLA Exchange.
- One simple and consistent means of borrowing, downloading, reading and returning a book, as well as logging into your library.
- A highly accessible interface for reading books either online or offline via an easy to use app that can be downloaded for free to a mobile device (iOS and Android).

Library Simplified-Cloud Hosted Administrative Interface

- Library staff can manage and curate their library's e-book holdings from multiple providers in one unified interface.
- Staff can easily create custom lists of content to be highlighted in patron's mobile devices.
- Monitor e-content use by patrons, including number of total titles in the catalog licenses, as well as amount of patrons with active loans or holds.
- Software fully hosted and maintained on cloud-based servers by LYRASIS staff.

DPLA Exchange-content YOUR Library Selects to Deliver to Their Patrons

- Libraries can source e-books and audiobooks to lend to patrons.
- Allows libraries to acquire unique content including independent, self-published and non-English language.
- Provides platform for library-driven innovation in collection development and licensing.
- Thousands of free titles available on the Open Bookshelf reviewed by a Curation Corps of librarians
- Visit exchange.dp.la
